

Mortgage Rates

Primary Mortgage Market Survey® (PMMS®) results are based on the mortgage rate collected from thousands of loan applications submitted to Freddie Mac through Loan Product Advisor® (LPA®) from lenders across the country when a borrower applies for a mortgage. [Learn more in our FAQs.](#)

Mortgage Rates Continue to Decline

Mortgage rates declined this week to a four-week low of 6.30%. Compared to one year ago when rates were at 6.83%, this is a meaningful improvement for homebuyers during what is typically the busy spring homebuying season.

- **The 30-year fixed-rate mortgage** averaged 6.30% as of April 16, 2026, down from last week when it averaged 6.37%. A year ago at this time, the 30-year FRM averaged 6.83%.
- **The 15-year fixed-rate mortgage** averaged 5.65%, down from last week when it averaged 5.74%. A year ago at this time, the 15-year FRM averaged 6.03%.

PMMS results are released weekly on Thursdays at 12 p.m. ET and are an average of loan rates offered the prior Thursday through Wednesday. [See our publication calendar](#) PDF.
